

Contents

1	Introduction	4
2	Advantages and disadvantages of high strength steels	4
3	Manufacturing process routes	6
4	Specifications, available grades and product types	8
5	Welding Metallurgy	9
6	Consumable standards, storage, handling and selection:	13
7	Fabrication / welding procedures (thermal cutting, heat treatment, etc.)	15
8	Considerations prior to welding	16
9	Development & qualification of welding procedures	17
10	Future developments	18
	Appendix A: Understanding the Metallurgy of Iron and iron-carbon alloys	19
	Appendix B: Welding Processes	22
	Appendix C: Typical Welding Procedure Specifications for Grade S460K2W Steel	26
	Appendix D: Typical Welding Procedure Specifications for Grade S460 QST Steel	29
	Appendix E: Typical Welding Procedure Specifications for Grade S460N Steel	31
