## Contents

Foreword	3
Contents	11
Scope	15
Definitions	17
1 Information required by the Steelwork Contractor	21
1.1 Allocation of design responsibilities	21
1.2 Project Specification for structural steelwork	21
Table 1.1 Proposed works – Checklist	22
Table 1.2A Design – Checklist	22
Table 1.2B Design – Checklist	24
Table 1.2C Design – Checklist	25
Table 1.3 Building Information Modelling (BIM) – Checklist	26
Table 1.4 Workmanship – Checklist	27
Table 1.5 Erection – Checklist	28
Table 1.6 Protective treatment – Checklist	28
Table 1.7 Inspections and tests – Checklist	29
Table 1.8 Programme – Checklist	29
2 Materials	31
2.1 Constituent products	31
2.2 Steel products	31
Table 2.1 Material and dimension standards	32
Table 2.2 Maximum thickness (in mm)	34
2.3 Welding consumables	35
2.4 Structural fasteners	35
Table 2.3 Matching ordinary (non-preloaded) assemblies	37
Table 2.4 Matching preloaded assemblies <sup>(1)</sup> <sup>(2)</sup>	38
Table 2.5 Ordinary tie bar assemblies	39
Table 2.6 Matching ordinary tie bar assemblies	40
Table 2.7 Holding down assemblies	41
Table 2.8 Cup and countersunk non-preloaded assemblies <sup>(1)</sup>	42
2.5 Shear studs	43
2.6 Reinforcing steel	43
2.7 Protective treatment materials	43
2.8 Proprietary items	43
2.9 Substitution of material or form of components	43
3 Information provided by the Steelwork Contractor	45
3.1 Information system	45
3.2 Building Information Modelling	45
3.3 General arrangement of components	45
3.4 Foundation and wall interface information	46
3.5 Fabrication information for components	46
3.6 Erection information	48

3.7	Drawing or information review	48
3.8	'As erected' structure	49
4	Workmanship – general	51
4.1	Identification	51
4.2	Handling	52
4.3	Cutting and shaping	52
4.4	Machining	53
4.5	Dressing	53
4.6	Holing	53
4.7	Assembly	54
4.8	Curving and straightening	54
4.9	Inspection	55
4.10	Storage	55
4.11	Accuracy	55
5	Workmanship – welding	57
5.1	General	57
5.2	Welder qualification	57
5.3	Welding procedures	57
5.4	Assembly	59
5.5	Testing of welds	60
5.6	Shear stud welding	63
5.7	Welding of reinforcement steel to structural steel	63
6	Workmanship – bolting	65
6.1	Ordinary (non-preloaded) bolt assemblies	65
6.2	Fit-up if using non-preloaded bolt assemblies	66
6.3	Preloaded bolt assemblies	67
	Table 6.1 Modified combined method	68
6.4	Fit-up if using preloaded bolt assemblies	68
7	Workmanship – accuracy of fabrication	69
7.1	General	69
7.2	Permitted deviations for rolled components after fabrication ( $\Delta$ )	69
7.3	Permitted deviations for elements of fabricated components ( $\Delta$ )	71
7.4	Permitted deviations for plate girder sections ( $\Delta$ )	74
7.5	Permitted deviations for box sections ( $\Delta$ )	78
7.6	Permitted deviations for lattice components ( $\Delta$ )	80
8	Workmanship – erection	83
8.1	General	83
8.2	Site conditions	84
8.3	Pre-construction information	84
8.4	Stability	85
8.5	Erection loads	85
8.6	Lining and levelling	85
8.7	Site welding	86
8.8	Site bolting	86
8.9	Certification of completion	86

---

9	Workmanship – accuracy of erected steelwork	87
9.1	Permitted deviations for foundations, walls and foundation bolts ( $\Delta$ )	87
9.2	Foundation inspection	89
9.3	Steelwork	89
9.4	Deviations	89
9.5	Information for other contractors	90
9.6	Permitted deviations of erected components ( $\Delta$ )	90
10	Protective treatment (corrosion and fire)	99
10.1	General	99
10.2	Paint systems	99
	Table 10.1 Generic protection coating specifications	100
10.3	Intumescent systems	101
	Table 10.2 Generic specification for intumescent systems	103
10.4	Surface Preparation	103
10.5	Application and inspection of coatings	105
	Table 10.3 Sampling plan	107
10.6	Coating of surfaces to be encased in concrete	109
10.7	Hot dip galvanising	109
	Table 10.4 Post-galvanising inspection	110
10.8	Metal spraying	111
11	Quality management	113
11.1	Competence of Steelwork Contractor	113
11.2	Quality system	114
	Table 11.1 Technical knowledge of Responsible Welding Coordinator <sup>(1)</sup>	115
11.3	Additional inspections and tests	116
11.4	Records	116
11.5	Modifications	116
	<b>Annex A</b>	117
	Weld testing – hold times	117
	Table A Recommended minimum hold times	117
	<b>Annex B</b>	119
	Welds – extent of routine supplementary non-destructive testing	119
	Table B Extent of routine supplementary NDT <sup>(5)</sup>	119
	<b>Annex C</b>	121
	Welds – acceptance requirements and measurement definitions	121
	Table C.1 Acceptance requirements for production welds in steel structures	121
	Table C.1 Acceptance requirements for production welds in steel structures (cont'd)	122
	Abbreviated terms and notes applicable to Table C.1	122
	Table C.2 Measurement definitions for production welds in steel structures	124

<b>Annex D</b>	125
Guidelines for visual inspection of welds	125
<b>Annex E</b>	127
Requirements for Execution Class 3 – static structures	127
Table 11.1 Technical knowledge of Responsible Welding Coordinator (EXC3 – static) <sup>(1)</sup>	129
Table B Extent of routine supplementary NDT for EXC3 (static)	130
<b>Annex F</b>	131
Guidance on Execution Class 3 – fatigue	131
F.1 Introduction	131
F.2 Typical buildings subject to fatigue	131
F.3 Role of the Engineer	131
F.4 Fatigue design	132
F.5 Detail categories	132
F.6 Fabrication requirements for fatigue sensitive structures	133
<b>Annex G</b>	135
Definitions from the Construction (Design and Management) Regulations	135
<b>Annex H</b>	137
Referenced standards	137
<b>Annex I</b>	139
List of BCSA Steelwork Contractor members	139
<b>Annex J</b>	141
Sustainability Specification	141
J.1 Introduction	141
J.2 Guidance for sustainable design of structural steelwork	144
J.3 Specification for sustainable fabrication of structural steelwork	147
J.4 Specific references	153
